

Brampton Highlights

Brampton Highlights

In 2011 Brampton had a total population of 523,911, an increase of 20.8% from the 2006 Census. Brampton ranked 2nd in population growth between 2006 and 2011 when compared to other municipalities greater than 100,000. At 34.7, Brampton had the lowest median age among Canada's largest cities.

Median Age

Brampton was one of the youngest communities in the Toronto Census Metropolitan Area (Toronto CMA) according to the 2011 Census data released by Statistics Canada on May 29, 2012.

The median age of Brampton's population was 34.7 in 2011, an increase of 1 year from 2006 (33.7). Median age is the point where exactly one-half of the population is older and the other half is younger.

Toronto CMA's median age was 38.6 years, younger than the provincial median age of 40.4 and the national median age of 40.6.

Age Distribution

In 2011, the **pre-school** population aged 4 and under accounted for 7.13% of Brampton's total population representing 46.95% of Peel Region's pre-school population.

Sex

The 2011 Census counted 258,705 (49.38%) men and 265,195 (50.62%) women in Brampton.

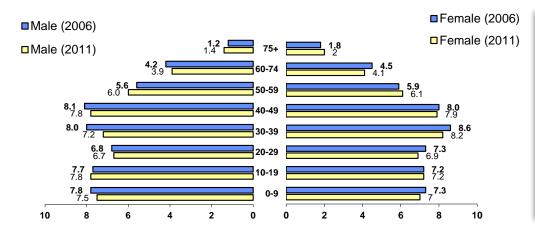

In Canada, the population of children aged 4 and under increased 11.0% between 2006 and 2011. This was the highest growth rate for this age group since the 1956 to 1961 period, during the baby boom. In Brampton, the increase for the same age group (4 and under) was 16.05%

Mono	45.2	42.5	6.35%
Toronto CMA	38.6	37.5	2.93%

Highlights from the National Census

According to data from the 2011 Census of Population, seniors accounted for 14.8% of the population in 2011, up from 13.7% in 2006. However, the proportion of seniors in Canada remained among the lowest of the G8 countries.

In 2011, Canada's lower share of seniors compared with other G8 countries was related to the fact that most of its baby boomers were still part of the working-age population (aged 15 to 64). The baby-boom generation consists of people born between 1946 and 1965 and is the country's largest generation.

As a result, the share of the working-age population in Canada, at 68.5% in 2011, was among the highest of the G8 countries.

The share of children aged 14 and under fell from 17.7% in 2006 to 16.7% in 2011.

As the baby boomers turn 65 in coming years, population aging will accelerate and the share of the working-age population will decrease.

The census counted 9.6 million baby boomers, nearly 3 in every 10 people.

Census Data Release Dates

The following table outlines the scheduled release dates of 2011 Census data by Statistics Canada and a brief description of each release. For more information about the 2011 Census visit Statistics Canada's website www.statcan.gc.ca.

✓	Wednesday, February 8, 2012	Release no. 1: Population and dwelling counts		
✓	Tuesday, May 29, 2012	Release no. 2: • Age and sex		
	Wednesday, September 19, 2012	Release no. 3:Families, households and marital statusStructural type of dwelling and collectives		
	Wednesday, October 24, 2012	Release no. 4: • Language
